

# Overcome Cyber Risk

Welcome to your ultimate  
vulnerability management suite!

Vultus one

vultusone

Your  
company  
safe &  
thriving.

Technology  
evolves faster than  
time itself.

New security threats emerge  
every second.

**Vultus.One** is your ultimate cybersecurity suite, integrating a holistic view over risk, empowering you to act proactively in anticipating attacks, while keeping your business secure at all times.

**All the information you need about your cybersecurity status gathered in one place, in real time.**

Are you ready to view your company's cybersecurity from a whole new perspective? Introducing an **all-new risk-based approach**.

# Cybersecurity made simple

We simplified data analysis and vulnerability classification, turning complex information into accessible and easily understandable knowledge to **make your business thrive**.

## Agility

**Beyond risk, beyond time:** Vultus.One gathers and understands risks through data intelligence, **seamlessly delivering in real time** an illustrated map of all existing vulnerabilities within your digital environments.

## Visibility

Vultus.One measures and depicts the risk posed by each existing vulnerability in **every environment** across your digital ecosystem, providing a **360° view** of your company.

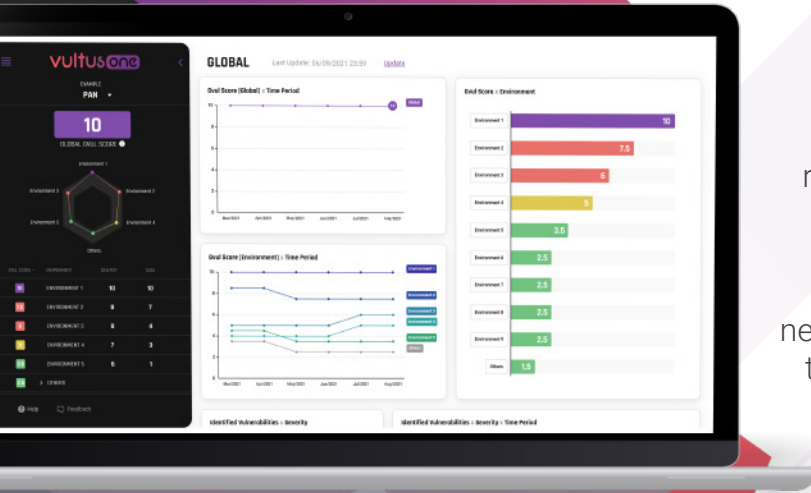

## Simplicity

**A common language for risk prioritization:** unique and proprietary indexes provide an accurate picture of the importance and severity of every vulnerability present in the context of each environment, and a clear view of how the problem is being solved, and of the efficiency of the security strategy.

# Why choose Vultus.One?

Proprietary threat intelligence, smart risk classification score algorithms, and deep analysis of the relationship between your IT ecosystem assets and business processes; all the information you need gathered in one place, to determine **truly critical threats** and enable remediation in the **minimum time possible**.

- **Live Dashboards** provide a **holistic view** of digital assets and risks
- **Local development and support**, with the expertise of a leader in digital security in Brazil
- Enhanced visualization and user experience, everything you need in **one single screen**
- Risk prioritization
- **Turn key**, multiplatform access, via web
- **End-to-end** vulnerability lifecycle tracking

**Learn more about how Vultus.One can help your business thrive, while staying safe and sound!**
